

National Health System Virtual Library Viability Project (Spain)

Juan-Quilis, V²; Lavandera-Fernandez, R³; Paez-Cervi, V⁴; Salas-Valero, M⁵; Muñoz-Gonzalez, L²; Novillo, D¹; Rivero, P¹; Martínez-Olmos, J¹

¹ Ministry of Health and Social Policy (Madrid). ² Andalusian Public Health System Virtual Library (Seville). ³ Health Research Office-FICYT. Principality of Asturias Government (Oviedo). ⁴ Virtual Health Sciences Library of the Balearic Islands. Government Health Department of the Balearic Islands (Palma de Mallorca). ⁵ Aragon Health Sciences Institute (Zaragoza).

Objectives

- To study the National Health System (NHS) Virtual Library set up viability.
- To elaborate the Spanish territory health information resources map.
- To identify the appropriate technological model.
- To identify the documentary services to be offered.
- To identify the more optimum functional, structural model.
- To identify the economic model.

Method

- To create a chart organization for the project's management.
- To organize work groups.
- To elaborate a standardised survey model for the libraries of the autonomous regions.

Results

- Identification of the different Autonomous Region libraries of health models.
- Recommendations for the NHS Virtual Library:
 - Functional, structural model.
 - Technological model.
 - Financial-economic model.

Personal bibliographic manager	9	7	

Conclusions

- The fact that the Virtual Library would be an invaluable space for access to quality scientific information, as well as that the minimum services could be offered to every NHS user regardless of geographical situation, is confirmed.
- Accordingly, we thought about three different models to develop the Virtual Library, depending on this initial analysis, which will allow us to establish the most suitable model for the Spanish National Health System, considering its economic, functional and technological recommendations.
- It would be necessary to do a study for the NHS Virtual Library Set Up following the recommendations arising from this Project.

Organization chart

Work schedule

Initial phase <i>December 2008</i>	<ul style="list-style-type: none"> • Creation of an internal information system • Definition and composition of working groups • Elaboration of a structured questionnaire.
Execution phase <i>March 2009</i>	<ul style="list-style-type: none"> • Data collection.
Analysis phase <i>June 2009</i>	<ul style="list-style-type: none"> • Situation analysis.
Development phase model building <i>October 2009</i>	<ul style="list-style-type: none"> • Elaboration of models.
Conclusions <i>December 2009</i>	<ul style="list-style-type: none"> • Discussion. • SWOT analysis.
Final report <i>January 2010</i>	<ul style="list-style-type: none"> • Presentation of final report.

Bienvenidos a la BV-SNS

La Biblioteca Virtual del Sistema Nacional de Salud es un proyecto del Ministerio de Sanidad y Política Social que garantiza el acceso de todos los profesionales del Sistema Nacional de Salud a los más importantes recursos de información científica en ciencias de la salud, así como a servicios bibliotecarios. El SNSP asegura así la cobertura y equidad del Sistema Nacional de Salud en lo que respecta al acceso de sus profesionales usuarios a los mejores evidencias científicas.
