EBSCO Discovery Service (EDS) le brinda acceso a toda la colección de su institución a través de un punto de acceso único. En este tutorial, veremos cómo realizar una búsqueda por palabras clave y revisaremos las funciones únicas disponibles en el EDS. Debido a que los administradores pueden personalizar la interfaz de EDS, su experiencia de búsqueda puede variar respecto a esta demostración.

Marque el limitador “Solo catálogo” para limitar los resultados solo a aquellos artículos disponibles en el catálogo de su institución. El limitador “Disponible en la colección de la biblioteca” restringe los resultados a aquellos elementos cuyo texto completo está disponible en línea (a través de bases de datos de texto completo de EBSCOhost, revistas electrónicas, etc.) o contenido físicamente disponible en su biblioteca.

EBSCO Discovery Service provides users with an easy, yet powerful means of accessing all of an institution's information resources through a single search. This is achieved by harvesting metadata from both internal (library) and external (database vendors) sources, and creating a pre-indexed service of unprecedented size and speed. Although the resulting collection can be massive in size and scope, the fact that it is indexed locally (on the EBSCOhost® servers) allows for exceptionally fast search response times. As no two institutions are the same, EBSCO Discovery Service offers a vast array of customization options with regard to both the underlying collection of metadata as well as the front-end delivery of search results. All of this functionality is based upon the powerful EBSCOhost search experience familiar to researchers worldwide.

Note: With many customization options for available to administrators, your EBSCO Discovery Service appearance will be unique.

EBSCO Connect

[EBSCO Connect](#) is available 24 hours a day, 7 days a week. Our FAQ database, [tutorials](#), and user guides can provide answers to your technical questions.
